Education

Maharaja Krishnakumarsinhji Bhavnagar University - Bhavnagar	56.94%
Bachelor Of Computer Application(BCA)	(2022 – 2025)
JN Mehta High School - Dungar	74.5%
Higher Secondary (Arts) 12th Standard	(2021 - 2022)

Skills

- Programming Languages: **JavaScript**, ES6, C, Core Java
- Libraries / Frameworks: **React Js**, **Express Js** , React-Routing , TanStack Query
- Tools / Platforms: Git, **GitHub**, VS Code, Postman , **MongoDB** Compass , **Node Js**
- Others: OOPs Concept, Core DBMS

Projects / Open-Source

- 1. Expense-Tracker (LIVE) | [GitHub](#)** *React js | Javascript | Recharts | React-Routing | Framer-Motion | Tailwind Css*
 - An interactive and visually engaging Expense Tracker application built with React.js and Tailwind CSS, designed to help users manage their finances effortlessly.
 - It features **dynamic data visualization** through **Recharts**, providing clear insights into income and expenses.
 - Smooth navigation is handled with React Router DOM, while **Framer Motion** adds fluid animations for a modern UI feel.
- 2. E-Commerce-Web | [GitHub](#)** | *React js | Express Js | Node Js | MongoDB | Tanstack Query | Axios | Tailwind Css*
 - CasualVibe is a full-stack e-commerce site built with the **MERN** stack and styled using Tailwind CSS.
 - It features product listings, cart, orders, and admin controls (ADMIN PANEL). Key features include **SwiperJS** sliders, Framer Motion animations, and **TanStack Query** for efficient data fetching.
 - The backend uses **Zod** for validation, **Multer** for file uploads, **Bcrypt** for password hashing, and **JWT** for secure authentication.
- 3. Personal-Portfolio (LIVE) | [GitHub](#)** *React js | React-Hooks | Email Js | Tailwind Css*
 - A sleek and responsive personal portfolio built using **React.js** and **Tailwind CSS**, showcasing a profile in an elegant and modern layout.
 - The application features dedicated sections for About, Experience, Projects, Skills, and Education, offering a clear and engaging overview of professional background and capabilities.
 - Integrated with **EmailJS** for seamless contact form functionality, enhanced with dynamic typing effects using **react-simple-typewriter** , and **Toastify** notifications, this portfolio ensures both interactivity and a polished user experience.
- 4. World-Atlas (LIVE) | [GitHub](#)** *React js | React-Router-Dom | Axios | API | Tailwind Css*
 - A modern and informative World Atlas web application developed using React.js and Tailwind CSS, designed to explore **countries** and their detailed information in an interactive format.
 - The app fetches real-time data for **all countries** from **API** via **Axios** and displays key details such as name, capital, population, region, and flags.
 - Users can click on any country to navigate to a dedicated page showcasing comprehensive data about the selected nation, thanks to seamless routing handled by **React Router DOM**.

Certifications

- React Js Virtual Internship -- TechGrow

25/12/2024 – 25/01/2025
